DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks, filed 07/18/2008, with respect to claims 1/11 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

The Examiner notes agreement with the Applicant regarding the motivation to combine the Umeda and Link references. The idea of having a filter on one side of the driving arms, but not the other, is believed to be non-obvious.

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 11 are believed to be allowable as the prior art failed to teach a laser diode driver which drives the laser differentially while having the first output being direct current (DC) coupled to the diode's first terminal and the second output being alternating current (AC) coupled to the diode's second terminal. Prior art documents such as US 2003/0043869 were found to teach DC coupling both sides of a diode, while US 2005/0025201 taught AC coupling both sides, and as was pointed out in the Remarks to previous office action (paper no.20080312) it is non-obvious to convert a dual sided AC device or dual sided DC device to the AC/DC combination as this would result in a loss of the taught filtering function motivation (US 5883910). The Examiner additionally makes reference to the series of Remarks filed by the Applicant in the

Art Unit: 2828

application case file which effectively expand upon the abbreviated comments herein.

The claims are therefor believed to be in condition for allowance.

Claims 2-10 are allowable as they depend from allowable claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
